niyinnocent2027@gmail.com | (410) 622-7477 | [linkedin.com/in/innocent-niyonziima](https://www.linkedin.com/in/innocent-niyonziima) | Washington DC-Baltimore Area

EDUCATION

Master of Science, Computer Science | The Catholic University of America, Washington, DC. **Aug 2024 - May 2026**

Bachelor of Technology, Computer Engineering | Marwadi University, India **Oct 2020 - May 2024**

EXPERIENCE

Full-Stack Software Engineer | ITEC International, Kigali, Rwanda **Jan 2024 - Mar 2026**

- Developed backend services and APIs for ITEC's SaaS products supporting student management, payments, and facility management systems.
- Contributed to the API layer of ITEC Pay, a payment platform supporting multiple payment methods.
- Provided technical support to partner companies and their developers integrating ITEC's payment gateway.

Graduate Research Assistant | Molecular Computing Lab, The Catholic University of America **Apr 2025 - Dec 2025**

- Built an automated evaluation framework comparing multiple open-weight LLMs on resource-constrained environments.
- Evaluated performance trade-offs across models including Gemma, Phi-3, Mistral, TinyLlama, and LLaMA.
- Automated model evaluation and metrics collection, reducing manual effort across repeated benchmarking experiments.
- Analyzed model efficiency vs performance for edge-device AI deployment scenarios.

Web3 Security Data Analytics Extern | Webacy, New York, NY **Aug 2024 - Oct 2024**

- Completed a project-based externship focused on Web3 security, blockchain technologies, and data analytics.
- Analyzed and labeled smart contract vulnerabilities to support security research and risk assessment.
- Worked with blockchain datasets using Python and Microsoft Excel to identify patterns and generate actionable insights.
- Collaborated with mentors and fellow externs to investigate Web3 security challenges and present technical findings.

Software Developer Intern | Nishkaam Innovations, Rajkot, India **Dec 2023 - April 2024**

- Contributed to 3 internal tools that automated recurring reporting tasks.
- Built workflow and task management tools improving internal operational efficiency.
- Collaborated with engineering small team to deliver production-ready features.
- Contributed to debugging, API design, and system improvements.

SKILLS

Frontend/Web: React, JavaScript, TypeScript, HTML5, CSS3

Backend/API: Node.js, Express.js, Python, REST APIs

Cloud & DevOps: AWS EC2, Linux, Docker, NGINX, CI/CD, VPS deployment

Databases: PostgreSQL, MySQL, MongoDB

Systems: API design, reverse proxy, load balancing, system debugging

AI/ML: LLM evaluation, model benchmarking, AI systems integration

PROJECTS

[Ibyapa.com](https://ibyapa.com) - Production Full-Stack Learning Platform

- Built and maintained a production web platform serving 80,000+ learners preparing for Rwanda's driving theory examination.
- Designed and developed the full application stack using React, Node.js, MongoDB, and REST APIs.
- Implemented core features including practice exams, subscriptions, payment integration, user authentication, and an administrative dashboard.
- Managed Linux-based production deployments using Docker, ensuring reliable performance and continuous platform improvements.
